

INTRODUCING CHIP CARDS

Enhanced Security for your Debit Cards

Toro Credit Union now offers debit cards with chip technology. The embedded computer chip provides more security and wider international acceptance.

A microchip embedded in the card adds a new layer of protection against fraud for purchases made at the point of sale. Information programmed into the chip is personalized for your account and each transaction generates a unique code, adding an extra safeguard against unauthorized use and counterfeiting.

These cards are already in wide use around the world and are now becoming the standard in the U.S.

Look for these new cards between now and the end of 2017.
